Aerospace and Defense

The aerospace and defense (A&D) industry is changing significantly. Global spending on defense and weapon system platforms is increasing.

Governments are procuring analysis and engineering services to address escalating terrorism threats, cybersecurity concerns, and an ever-increasing demand for big data analytics. Commercial space and unmanned vehicle advances have invigorated key sections of the industry. Brexit and the administration change in the U.S. are creating challenges and opportunities across the globe. And, technological advances such as 3-D printing are creating unique opportunities for innovative products, decreased time-to-market schedules, and agile maintenance and repair services. Our clients demand experience. They need comprehensive and cost-effective support from lawyers who know their business and understand the demands of their industry.

Our global A&D practice is focused specifically on your needs. Our team includes industry-leading lawyers with corporate, commercial, regulatory, investigations, and litigation experience. We work closely with some of the largest and most established A&D companies in the United States, Europe, and Asia. We advise dozens of middle market businesses, emerging companies, new ventures, global entities, along with investment banks and private equity firms that are active in the industry.

Our clients are also some of the most innovative in the world. Our clients build manned and unmanned aircraft, supply parts...
Companies
