

Stuart M. Langbein

Partner

Washington, D.C.

Biography

Stuart Langbein brings a passion for health care to his office each day. He is renowned for his leadership in facilitating the market viability of new medical technologies, and knows how to develop and implement strategies that secure their coverage, coding, and reimbursement.

When clients work with Stuart, they quickly learn about the importance of being proactive. That's especially critical for organizations with new medical technologies; Stuart is often advising them long before they're granted Food and Drug Administration approval.

Stuart routinely works with a cross-section of medical technology organizations, including pharmaceutical, biological, and medical device companies; trade associations, and academic medical centers. He continues to build on his prior experience at the Centers for Medicare & Medicaid Services, as well as on his long-term relationships with many agency officials.

Stuart is a longstanding volunteer for the JDRF, an international organization focused on a cure for diabetes. He coordinates the Hogan Lovells Walk to Cure Diabetes team, and works on national government advocacy issues related to diabetes.
