

Space and Satellite

Hogan Lovells is a cutting-edge, end-to-end strategic legal practice for satellite system operators, investors, manufacturers, or other transaction parties. We work with those involved in “traditional” space, NewSpace, and government procurements, around the world.

We help companies take their satellite systems from drawing board to implementation, and safely navigate the multilayered risks and issues they will face. We understand the technology, business, and regulatory issues ahead of you, and know the strategies necessary to achieve real world success.

Our lawyers have unique space-specific knowledge and experience. They have worked in-house, as general counsel, and as “outside general counsel” for top-tier commercial, government, and private equity/venture capital clients. We have been pioneers alongside our entrepreneurial clients for their most innovative industry developments. Acting as an integrated part of your team, we work to understand what you need and the challenges you face to structure the best transaction for you.

We successfully navigate the challenges that high-profile and NewSpace industry participants face, wherever they are located. We have a robust inventory of winning resolutions, unparalleled complex deal experience, a cohesive global team approach, and deep industry experience.
