

Dylan Hanson

Senior Associate

Silicon Valley

Biography

Dylan Hanson uses his computer science background in helping his clients navigate through their strategic and financial matters. He represents technology and life sciences companies with respect to negotiating and executing complicated cross-border M&A transactions.

Although Dylan's practice focuses on technology and life sciences companies, he has experience representing clients in a large number of industries. Dylan enjoys his current practice, as the mix of clients and targets allows him to use a technical approach when offering advice.

Prior to law school, Dylan worked as a computer programmer for five years for companies in Iowa and New York City. After law school, Dylan worked for an elite international law firm in New York City where he worked directly with clients on a large number of transactions in a non-industry-specific practice. Dylan joined Hogan Lovells in 2018 and moved to California to work closely with the Silicon Valley team and clients focused on technology and life sciences matters.

Dylan graduated from Columbia Law School in 2012, where he served as an online content editor and web designer in the early days of the *Columbia Business Law Review's* online presence. In his free time, Dylan enjoys mentorship opportunities, running, and Hawkeye football.
