

## Wireless

Competitive wireless sector players continually flex new muscles. Participating in new areas like media. The broadcast spectrum incentive auction process. And complying with ever-changing regulations.

The lawyers at Hogan Lovells assist clients across the wireless ecosystem. Engaged in every major wireless proceeding at the FCC, our team includes the former head of the FCC's wireless telecommunications bureau. And the wireless bureau's former chief engineer.

We offer regulatory, policy, and compliance counsel.

Commercial, litigation, and M&A. Honed by experience from government and industry.

Wireless carriers, equipment manufacturers, infrastructure providers, app developers, technology vendors, and others face hurdles in an increasingly dynamic marketplace.

Hogan Lovells has every one of them covered.

## Latest thinking and events

### Hogan Lovells Publications

Companies today need to routinely assess their wireless network connectivity options related to their products and overall operations
