

## Zhan Jia

Patent Engineer  
Dusseldorf

### Biography

Zhan Jia advises and supports clients on all technical aspects of patent law with a focus on nullity and infringement proceedings. Zhan has particular experience in analysing IT & telecommunications products for the existence of patent infringement and assessing the novelty of patented systems and procedures.

Prior to joining Hogan Lovells he worked for an automobile manufacturer as an IP professional as well as for a technology company as a patent research analyst, where he gained practical experiences of providing professional support for IP litigation.
