

The connected car: How European data protection, smart transport systems, and competition law intersect

2018

The Journal of Robotics

In this interview in the Journal of Robotics, Artificial Intelligence & Law, Winston Maxwell and Gianni De Stefano of Hogan Lovells discuss how European data protection, smart transport systems, and competition law intersect and the impact they will have on the connected car.

The interview discusses how European data protection, smart transport systems, and competition law intersect and the impact they will have on the connected car.
