

Banking Services

At a time of unprecedented disruption, our market leading practice helps clients navigate the challenges and opportunities brought by new entrants, new technologies, and new regulation.

We act across the industry. Helping the largest retail banks develop new products, deal with regulators, and manage regulatory change. Partnering new entrants and start-ups as they explore the regulatory perimeter, develop their offerings and get to market. Working with FinTech companies as they explore disintermediation, digital currencies, and new uses for blockchain. Our extensive experience helps clients find solutions in a complex and ever-changing regulatory landscape.

Representative experience

Acted for a UK challenger bank on the UK Competition and Markets Authority's market study into the personal current account market.

Advised wholesale banking providers on customer documentation and approach to regulation across multiple jurisdictions.

Advised various financial institutions across four continents on drafting and revision of customer documentation, including current account and credit card terms and conditions, mortgage products, and disclosure documents.
