

Comparative overview of tax laws and regulations in Poland

06 October 2017

The In-House Lawyer

Andrzej Dębiec and Zbigniew Marczyk have contributed the chapter on Poland for the second edition of the *Tax Country Comparative Guide*. In the form of a Q&A, the guide is an answer to the most important challenges that any foreign business operating in Poland faces.

Legal500's guide aims to provide readers with a pragmatic overview of tax laws and regulations across a variety of jurisdictions. Each chapter, prepared in form of Q&A, describes most important information regarding, among others: withholding tax, transfer pricing, the OECD model, GAAR, tax disputes, and an overview of the jurisdictional regulatory authorities.

As one of the contributors to the guide, our office in Warsaw would like to present the overview of tax regulations in Poland
