

Management Incentive Plans

Management incentivization is a critical factor in the success of your investment. How you structure management incentivization packages in a tax efficient manner is also key.

We help structure, draft, and negotiate management incentivization packages in the context of buyouts and equity roll overs. Collaborating with our tax, employment, and management incentive colleagues, we advise on the best structure and negotiate the key terms that work for you. We're adept at handling any management issues that arise throughout the investment process.
