

Stephanie Fishman

Associate

Washington, D.C.

Biography

Stephanie Fishman handles technical matters across the entire energy sector. She brings years of federal government experience, and a background in nuclear engineering and energy project financing, to assist clients with high-stakes transactions and address complex regulatory needs.

Stephanie complements her legal skills with her unique handling of international energy projects. Prior to law school, Stephanie worked for the Defense Threat Reduction Agency within the Department of Defense managing nuclear security contracts in Kazakhstan, South Africa, and Jordan. Before that, she served as an Analyst Intern with the Central Intelligence Agency. These experiences prepared her to bridge the technical divide between understanding evolving commodity markets and regulatory requirements.

Before joining Hogan Lovells, she was a judicial law clerk with the Atomic Safety & Licensing Board Panel at the NRC where she analyzed a variety of federal regulations to assist in drafting orders for the judges. During law school, she handled clean energy initiatives, assisted in litigation as a law clerk at the Department of Energy, and was a member of the *American University Law Review*.
