Biography

George Salter draws on his experience with accounting and financial reporting matters to advise clients in cases involving complex accounting issues, including numerous post-closing, balance sheet adjustment disputes arising out of corporate mergers. He has over 25 years of experience advising accounting firms in all facets of litigation, regulatory, and risk management matters.

He has represented auditors in some of the profession's most significant matters, including complex multiparty domestic and cross-border litigation involving billions of dollars in damage claims. Often this litigation requires simultaneously defending and coordinating multiple fronts, such as in securities fraud class actions, professional malpractice cases, bankruptcy proceedings, trustee and receiver actions, and multijurisdictional government investigations.

A leader of our Accountants Liability practice, George has a deep understanding of his clients and the accounting profession. He advises accounting firms in dealings with their primary regulators, including investigations and enforcement actions by the Public Company Accounting Oversight Board (PCAOB), Securities and Exchange Commission (SEC), and State Boards of Accountancy. George also advises accounting firms and audit teams on professional practice matters
