BAE Systems, Inc.*

**GW Law School (2000 H Street, N.W., Washington, D.C. 20052)**

**Jacob Burns Moot Court Room**

Join the Government Procurement Law Program for a symposium on cybersecurity in government contracts. The Department of Defense (DOD) is imposing more rigorous cybersecurity requirements on government contractors than ever before as the foundation for being able to do business with the agency. The conversation will delve into regulatory, policy, and compliance issues related to cybersecurity in government contracts, including a presentation by DOD's Richard Gray on the evolution of DOD regulations, a keynote address by Alice Eldridge on the importance of cybersecurity, a panel focused on the Cybersecurity Maturity Model Certification (CMMC) and other quickly evolving DOD cybersecurity regulations, and a cybersecurity roundtable addressing topics such as incident response, cyber-crime, supply chain, and legislative developments related to cybersecurity.
